Software Engineering student with freelance experience building and maintaining a bilingual web platform. Project work includes Java APIs, PostgreSQL access control, and Python data tools. Available for remote part-time work now and full-time roles after graduation in 2027.

EDUCATION

The University of Texas at Dallas Expected 2027
B.S. in Software Engineering

EXPERIENCE

Freelance Full-Stack Developer | Schicgirl Mar 2024 - Present
JavaScript, HTML/CSS, Supabase/PostgreSQL | Remote

- Maintain a bilingual platform for bookings, diagnostics, memberships, and private learning tools.
- Designed an 11-table PostgreSQL schema with row-level security and subscription checks.
- Fixed returning-member access failures with session refresh and a retry on unauthorized requests.
- Standardized French and English form values to prevent mismatches and accidental data overwrites.

SELECTED PROJECTS

NABIELA notes 2026
JavaScript, IndexedDB | Private product in development

- Developing a study notebook with course folders, editable diagrams, note reviews, and Word export.
- Lead AI-assisted development of autosave, backup recovery, and editing across windows.

InsightFlow 2026
Python, Flask, Pandas, Matplotlib

- Built a Flask app for CSV cleaning, anomaly flags, and data previews, plus a CLI for PDF reports.
- Shared cleaning and analysis modules across both interfaces and deployed the web app on Render.

Math Adventure 2025 - 2026
Java, Spring Boot, JUnit/MockMvc, JavaScript | Team project and solo refactor

- Refactored a six-person course project into Spring services with dependency injection and JSON APIs.
- Expanded the JUnit test suite and split the frontend into eight ES modules.

TECHNICAL SKILLS

Languages used in projects: Java, JavaScript, SQL, Python, HTML/CSS
Backend and data: Spring Boot, Flask, PostgreSQL/Supabase, IndexedDB, Pandas
Testing and tools: JUnit, MockMvc, Git/GitHub, Linux terminal, Render

ADDITIONAL EXPERIENCE

Associate (Internship) | The Global Career Accelerator Jan 2026 - May 2026

- Analyzed datasets and A/B tests in Excel; debugged and refactored code through GitHub.

Transaction Processor | Conduent Jan 2023 - Jul 2025

- Processed financial transactions and resolved discrepancies under accuracy and compliance rules.
